RE: Junior Software Developer

Dear Hiring Manager,

I am extremely excited about the opportunity as a Software Developer at Allied Vision. Currently, I am a graduate with Computer Science Bachelor's degree. As a "sporty geek", I love exercising, and I am highly interested in digital graphics such as rendering 3D objects on a 2D canvas and transforming a 3D object view by using matrix calculation.

As your listed requirements closely match my background and skills, I am confident that I would be qualified for this position. A few of my qualifications I would like to highlight are:

- Bachelor's degree in Computer Science, specialized in C, C++, C#, and Java.
- Proficient in Operating system: Windows, Linux Ubuntu, and Mac OS.
- Developed and published an Android App: Student Attendance Signup System.
 - Used OOD such as Encapsulation, Data Protection, Inheritance, and Interface.
 - Followed agile development process.
- Completed two graphic projects using Visual Studio, Qt, and OpenGL.
- Quick learner and debugger. Proficient in writing automated tests. Familiar with JIRA.
- Used to work at Tim Hortons drive-thru cashier; pleased to meet new people and enjoyed collaborating with other members to serve every car nicely and quickly.

I've attached my resume that details my projects relative to this position. These projects can be reached at my GitHub: <https://github.com/Aceyee>. Based on above, I believe my technical and interpersonal skills would allow me contribute to your development team.

Thank you for your time and consideration. I look forward in discussing my qualifications further in an interview. Please feel free to contact me via 778-922-2929 or zaeye1028@gmail.com.

Yours Sincerely,
Zihan Ye
